

GENERAL DESCRIPTION

These adaptor bases are used to install Standard Vega and Vega Lite analogue-intelligent fire detectors on the ceiling's surface. This type of adaptor base is characterized by a shorting clip connecting the two negative terminals; this feature allows more flexibility when connecting Standard Vega or Vega Lite intelligent detectors to the loop, permitting the continuity of the loop cabling to be tested after installation and prior to the detector being fitted. This manual explains how to apply analogue loop wiring to these base adaptors according to the detector type; wiring is provided for Standard Vega and Vega Lite detectors.

ANALOGUE SYSTEM WIRING FOR STANDARD VEGA AND VEGA LITE DETECTORS

Refer to picture 1 for the analogue-intelligent wiring configuration for the Standard Vega and Vega Lite detector.

WARNINGS AND LIMITATIONS

Our devices use high quality electronic components and plastic materials that are highly resistant to environmental deterioration. However, after 10 years of continuous operation, it is advisable to replace the devices in order to minimize the risk of reduced performance caused by external factors. Ensure that this device is only used with compatible control panels. Detection systems must be checked, serviced and maintained on a regular basis to confirm correct operation.

Smoke sensors may respond differently to various kinds of smoke particles, thus application advice should be sought for special risks. Sensors cannot respond correctly if barriers exist between them and the fire location and may be affected by special environmental conditions.

Refer to and follow national codes of practice and other internationally recognized fire engineering standards. Appropriate risk assessment should be carried out initially to determine correct design criteria and updated periodically.

WARRANTY

All devices are supplied with the benefit of a limited 3 year warranty relating to faulty materials or manufacturing defects, effective from the production date indicated on each product.

This warranty is invalidated by mechanical or electrical damage caused in the field by incorrect handling or usage. Product must be returned via your authorized supplier for repair or replacement together with full information on any problem identified. Full details on our warranty and product's returns policy can be obtained upon request.
